

F. H. BRUNDLE

BRUSH STRIP

Brush strip can be used for an infinite variety of applications, including sealing against air, light, dust and sound. They can also be fitted as guides and retainers.

The brush strips are produced by folding polypropylene brush filament (1) over a galvanised centre wire (2) which is then continuously crimped with a zinc plated steel strip (3). The completed strip is then inserted into a mill finish, aluminium holder (4).

Brush profile H used on cable ducting
