

Handrailing & Balustrade Systems

Welcome

With this brochure, our aim is to give you a taste of the wide range of stylish balustrade and balcony systems that we offer. We have many options available, designed to meet modern tastes and requirements.

Our stunning range includes our post and glass systems for ease of installation, frameless glass balustrade, for uninterrupted views, and for maximum versatility, our unique sleeve fit glass clamp brackets, which require no drilling of the post.

Our friendly staff are always pleased to offer help and advice about our products and welcome any queries you may have.

To make your life easier, visit www.liveconfigurator.co.uk, where you can design realtime for FREE, and receive quotes and drawings within minutes.

We look forward to being of service.

Frameless Glass Balustrade

with top rails

To make the most of open views, we have an extensive range of frameless glass balustrade systems suitable for most locations. These include systems for both domestic and commercial locations. Bolt-down and side-fix options are available.

We complete the range with a selection of top rails and edge protection.

Square • Round • Oval • Rectangle

Our frameless glass balustrade systems are available in a satin or PPC black, or mill finish. They offer between them a range of glass thicknesses from 12 - 33mm:

Wedge-Loc Slim	OnLevel 3010
Wedge-Loc Duo	OnLevel 3011
Wedge-Loc F-Type	OnLevel 6020
Tilt-Loc	OnLevel 6021
POSIglaze	Mega-Grip
POSlone	

Frameless Glass Balustrade

range overview

A frameless glass balustrade will provide spectacular results every time, making the most of the views with clean lines and simple installation. To meet our customers' requirements, we offer several methods of glass balustrade fixing systems.

All our systems are either base or side-fixed and can be shaped to suit installation requirements. Our aluminium glass balustrade channel can be finished with our top rail systems which, where required, can also be shaped to match, producing stunning results time and time again.

- Base or side-fix option
- Satin anodised, PPC black or mill finish
- For domestic & commercial use
- Quick & easy to install
- Suitable for 12 - 33mm glass thickness
- Glass supplied from stock

Post & Glass System with handrail

A range of classic styles available in stainless steel Grade 304 and 316, with a satin or mirror finish, and a choice of sizes.

Our post and glass system is elegant and timeless.

To make life easier for installers, glass clamps and base plates are already fitted to the posts.

There is also the option of having no handrail if preferred.

Post & Glass System

without handrail

Our post and glass systems are designed to make life easier with a variety of spigots to suit most needs. Suitable for use with drops under 600mm without handrails. Bolt-down, concrete-in and side-fix options are available.

Square Post & Glass System

For a contemporary style, our square post and glass system not only looks great, but is also available in stainless steel Grade 316 in a satin finish.

Available for use with or without handrail.

Glass Spigot Systems

Quick and easy to install...

Made from Duplex 2205 ultra marine grade stainless steel, these spigots are economical to use and do not require any holes in the glass. In a beautiful satin or PPC black finish, they can be used with 10 - 21.5mm glass. Available in round or square versions.

Our Tilt-Loc system has top and side-fix options and is made from Duplex 2205 ultra marine grade stainless steel. Tilt-Loc spigots can be easily adjusted by hand from one side. Tilt-Loc doesn't need any holes in the glass. With a satin finish, this range can be used with 12 - 25.5mm glass. (Side-fix shown.)

Tilt-Loc™ Edge

Tilt-Loc Edge completes this very versatile range. Simple to fit, easy to adjust, Tilt-Loc Edge not only looks great, but is very cost effective.

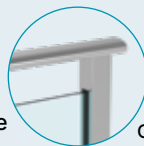

Marano[®] System

with handrail

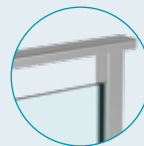

MARANO[®]

Beautiful, modern, and light to handle, we think this system will be a winner for many situations. It is simple to install and available in a satin or PPC black finish.

Oval

Rectangle

Choose the
right height
for you!

Marano® System without handrail

Marano can also be installed without a handrail in many situations, to give a view uninterrupted by a handrail. An excellent solution for mobile home decks!

Wire Rope Systems

Commercial solutions - ideal for offices

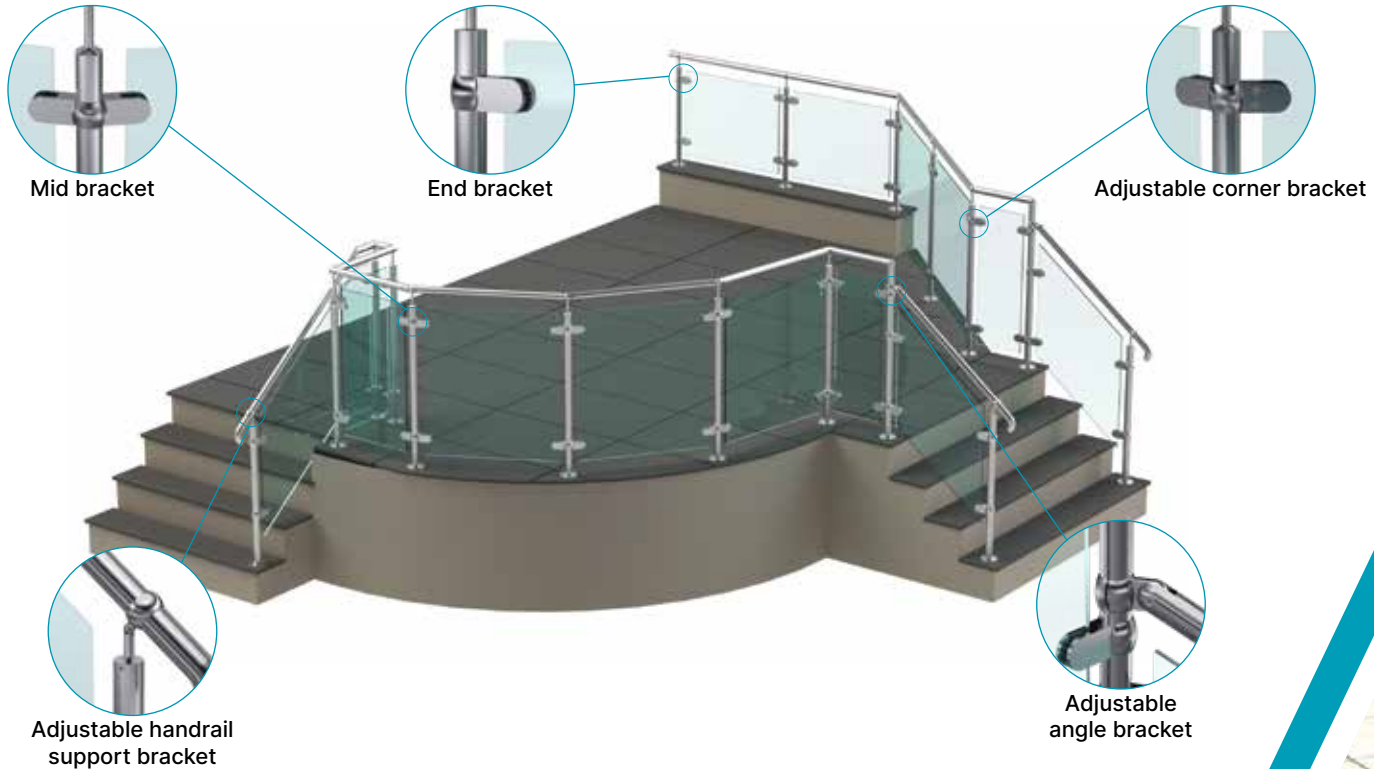

Our stainless steel Wire Rope System is a cost effective alternative to our Crossbar System. Both of these systems are ideal for many commercial premises and outdoor spaces, but are not recommended for domestic locations with a drop of 600mm or more at one side.

Crossbar Systems

With clean lines and modern styling, our Crossbar System is perfect for a contemporary look.

Pro-Railing® Sleeve-Fit Glass Clamp Brackets

This unique system offers a superb solution to slopes, curves, and stairs, allowing balustrades to change angle easily without drilling the posts. It is simple, versatile, and useful in many situations.

Three easy steps to creating the perfect balustrade...

Select your post height, choose your post top, and decide on base or side-fix.

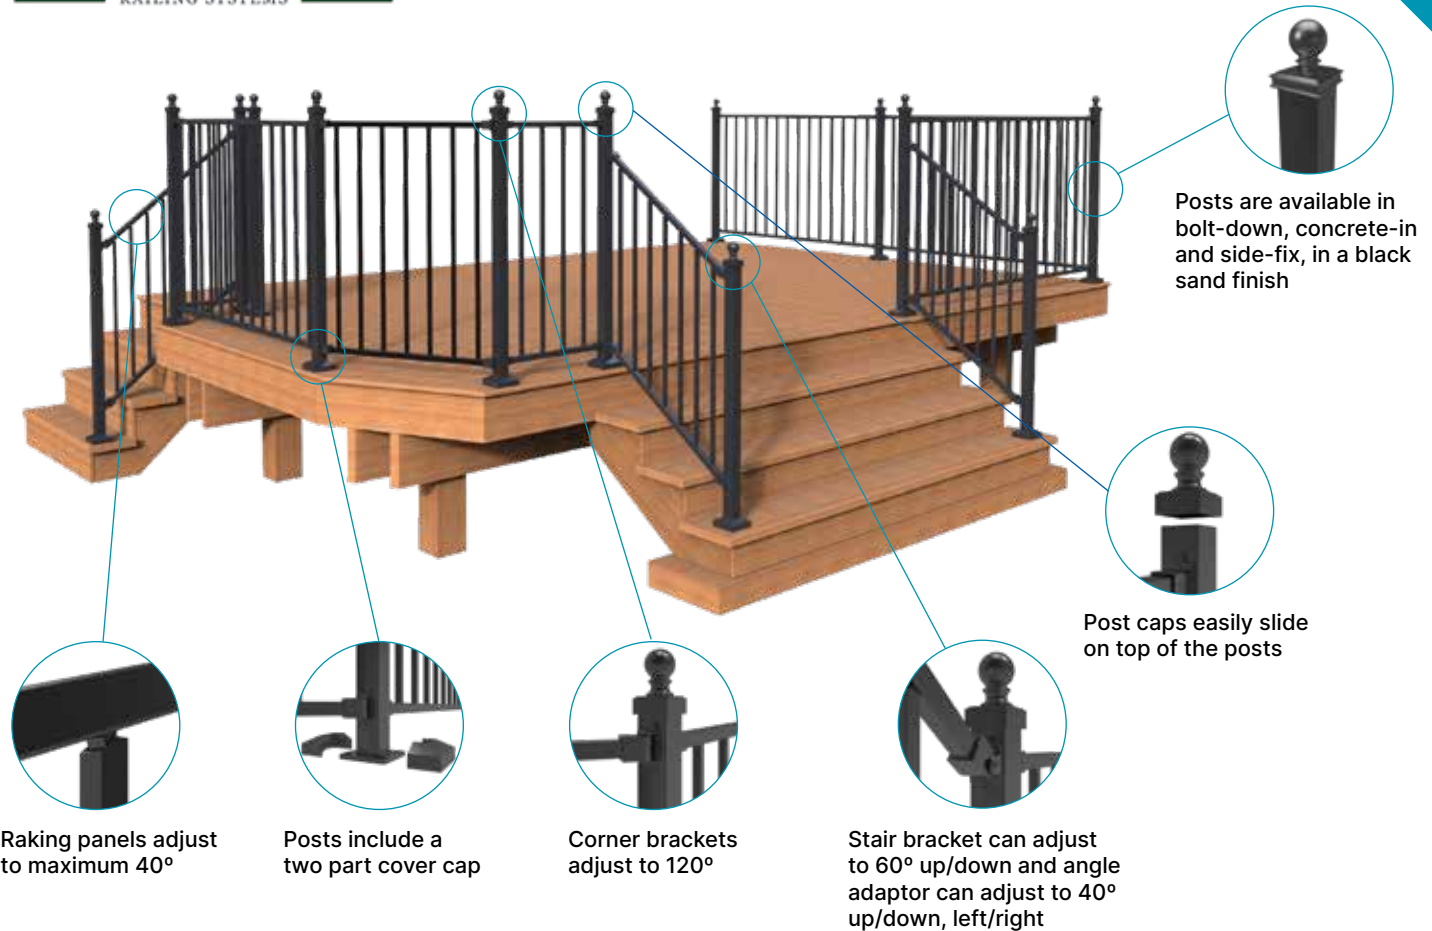

Marano® Simplicity System
aluminium railings and gates

Simplicity
make life easy...

Exceptional value and
low maintenance.

Strong, simple and versatile - make life easy!

Fortitude™ Steel Railings

Fortitude can be fixed to steel or wooden posts and brick walls. To make life easy, the raking panels adjust for steps, sloping ground and different angles. Available in black sand.

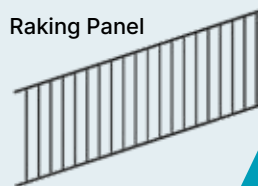

Fixed Full Panel

Fixed Half Panel

Fortitude™ Steel Railings with circles

Stylish railing panels for that special effect.

Fixed Circles Panel

Glass

If you require bespoke sizes, holes or shapes in different colours, including opaque, we offer a range of made to order laminated and toughened glass panels up to 33mm thick at very competitive prices.

Our standard stocked glass panels have polished edges and dubbed corners. Available in 10 - 15mm toughened monolithic clear float glass and 17.5 & 21.5mm PVB toughened laminated glass.

With our glass gate fittings you are able to create beautiful fences and gates from our standard 12mm glass panels and spigots.

Rinato™ Composite Fence & Gate Boards

Birch

Chestnut

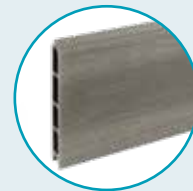

Twilight Grey

Ebony

Our second generation Rinato composite fencing system looks amazing and is both easy to use and cost effective. It will also enhance any garden and create a contemporary focal point. This versatile recycled composite system has been fully tested for sound absorption and is an eco-friendly product made from combining waste wood particles and thermoplastic resin.

Synergised™ Aluminium Deck Boards

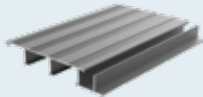

Original Boards

Tested by the UK's leading fire test centre to EN 13823, EN 13501 and EN ISO 1716. All elements of the Synergised system achieve Euroclass Classifications of A1 and A2fl-s1. Designed for balconies, roof terraces and all other decking applications. Our boards are manufactured from structural grade 6063 T6 aluminium and have a 100 micron Qualicoat™ premium powder coating.

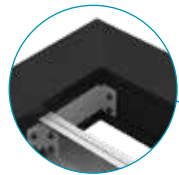

Connected Boards

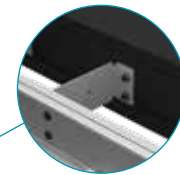

The latest offering to our aluminium decking range is the Synergised Connected system. Manufactured from structural grade 6063 T6 aluminium, and supplied with a non-slip powder coated finish, its unique interlocking boards allows the system to stay seamlessly connected, whilst offering integrated drainage channels, to direct rainwater away from under the deck. All boards are discreetly and quickly fixed onto the substructure, before fixings are hidden from view, by the next adjoining board.

Perimeter Base System

Aluminium

Spigots

Frameless

Our unique innovative perimeter base section bolts directly to the Synergised subframe and is perfect for use with our Synergised aluminium deck boards. It allows for a wide range of our base-fix handrailing solutions to be bolted direct to the perimeter, to provide safe, stunning edge protection where there is a fall more than 600mm. The internal perimeter support jack provides the strength required to allow handrailing systems to reach the desired residential 0.74kN loading requirements, as per BS 6180.

Decking Substructure

Synergised™ Aluminium Subframe & Cradles

Ground Screws

Polymer Profiles

All designed for ease of use, our range of decking substructure components work well together and can be used with a wide range of deck boards.
