### Elcometer 154 Plastic Wet Film Combs

The Elcometer 154 Wet Film Combs are made from ABS plastic and are designed to be used once and kept as a record of wet film thickness measurement for quality assurance or customer requirements.

They can also be used to check the wet film thickness of paint as it is being applied to metalwork.

Metric and Imperial values are on the same comb, 50 to 800µm (microns) on one side, 2 to 32mils on the other. Each comb has 16 measurement steps.

F H Brundle supplies combs in single pieces.
