

Securifor® 2D

Featuring a toe and finger-proof mesh aperture, this system combines an anti-climb and anti-cut fence with excellent through visibility and resistance to vandalism. This new panel incorporates a unique combination of increased vertical wire diameter and the incorporation of a double horizontal wire. The result is a very rigid panel, higher level of strength and security and an extremely flat panel. This is a ground breaking product offering new levels of discreet high security protection for schools, industrial and commercial premises.

Specification

Mesh Pattern	76.2mm x 12.7mm welded at each intersection
Horizontal Wires	4mm dia at 12.7mm centres on the attack face and intermittent 4mm dia Double wires at 152.4mm centres on the inside face
Vertical Wires	6mm dia at 76.2mm centres
Weld strength	75% of the minimum tensile strength of the wire
Finish	Polyester coated with a galvanised substrate
Presentation	Panels are butt jointed together at each post for security with a unique single drilled fixing bracket. Posts are fitted with a single row of M8 threaded inserts. Post centres at approximately 2.550m

Fence Height m	Panel Size Height/Width mm	Weight/Panel Kgs	Product Code
1.2	1220 x 2520	35	56SEC2D12
2.0	1985 x 2520	58	56SEC2D20
2.4	2442 x 2520	71	56SEC2D24
3.0	3048 x 2520	88	56SEC2D30

Securifor® Posts for 3D & 2D Panels

All intermediate and end posts are manufactured from high grade steel rolled and welded rectangular/square hollow section tube, complete with M8 threaded inserts fitted on the front face and black plastic top caps which are polyester coated with a galvanised substrate.
